3. Save Earth Campaign

Water is life. It is the basic necessity for every human being living on this planet. We can stop throwing wastes into open water bodies. At home, we can use water cautiously and ensure that it doesn't get wasted. Remember, a large many people are still deprived of safe pure water. Electricity has to be saved. It allows people, governments and businesses to save money, and it lets power plants avoid costly upgrades. However, global warming has made energy efficiency a big issue in recent years, and experts agree that reducing electrical usage will result in less carbon dioxide released into the atmosphere. Trees contribute to their environment by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe.
